PROFILE

Second-year IT undergraduate at SLIIT and Dean's List student, interested in software development and AI. I build web apps with Spring Boot, React and SQL Server, machine learning models with Python, and IoT projects with ESP32 and Arduino. Open to internships and projects where I can learn and build useful things.

EDUCATION

BSc (Hons) in Information Technology 2025 – Present

Sri Lanka Institute of Information Technology (SLIIT) — currently Year 2, Semester 1

- **CGPA: 3.66 / 4.0** · Year 1 Semester 1 GPA: 3.75 (Dean's List) · Year 1 Semester 2 GPA: 3.56
- **Relevant modules:** Data Structures & Algorithms, OOP, Database Design, Software Engineering, AI & Machine Learning

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, SQL, C
Backend	Spring Boot, Spring Security, JWT, JPA / Hibernate, REST APIs
Frontend	React, Vite, Tailwind CSS, Thymeleaf
Databases	Microsoft SQL Server, MySQL
AI / ML	TensorFlow, Keras, scikit-learn, OpenCV, Pandas, NumPy
Tools	Git, GitHub, Docker, Railway, IntelliJ IDEA, Google Colab, Arduino
Core concepts	OOP & SOLID, MVC, DSA, database design (EER, procedures, triggers), Agile / Scrum, software testing
Spoken languages	English, Tamil, Sinhala

PROJECTS

SmartNest — Apartment Sales System 2026

Team of 5 · React, Spring Boot, Java 21, Spring Security, JWT, SQL Server, Tailwind · GitHub

- Developed a full-stack platform in a 5-member team: listings, site visits, reservations and staff dashboards.
- Built the Promotion Management module end to end: REST APIs, validation, manager approval and notifications.
- Designed the EER model and SQL Server schema, and secured the app with Spring Security and JWT for 5 user roles.

Malaria Cell Image Classifier 2026

AI/ML project · Python, TensorFlow, Keras, scikit-learn, OpenCV

- Built and tuned a CNN from scratch to classify blood cell images as infected or healthy (NIH dataset, 27,558 images).
- Achieved **94.2% test accuracy** and **0.975 ROC-AUC**, using a patient-wise split (200 patients) to prevent data leakage.
- Built the data pipeline (cleaning, augmentation, PCA) and compared with SVM, Random Forest and Logistic Regression.

AI-Powered POS & Inventory System 2026

Personal project · Spring Boot, SQL Server, React, Groq LLM API · GitHub

- Built a web POS for a wholesale and retail shop: invoicing, stock tracking, product search and restock suggestions.
- Integrated an LLM assistant that answers questions about sales and stock, with role-based access for owners and staff.

Student Course Registration System 2025

SLIIT OOP Exhibition · Java, Spring Boot, Thymeleaf, MVC · GitHub

- Developed the full backend solo for an MVC app with Admin, Student and Lecturer dashboards, enrolment and scheduling.
- Implemented role-based sessions and a custom file-based storage layer using OOP design principles.

IoT Projects — Smart Gate & Greenhouse Automation Personal

ESP32, Arduino, 433 MHz RF, sensors · Smart Gate, Greenhouse

- ESP32 gate controller that replays a 433 MHz remote signal over Wi-Fi; Arduino greenhouse with sensor-driven fan and pump.

ACHIEVEMENTS

- **Dean's List** — SLIIT, Year 1 Semester 1
- **N3:GO Excellence Award** — Code Night, SLIIT (Aug 2026)
- Selected for the **SLIIT OOP Exhibition** (2025)
- **IEEE Student Member** — IEEE Sri Lanka Section (2026)

CERTIFICATES

- **CS50x: Intro to Computer Science** — Harvard (online), 2024
- **CS50P: Programming with Python** — Harvard (online), 2024
- **Python for Beginners** — Univ. of Moratuwa, 2025
- **Web Design for Beginners** — Univ. of Moratuwa
- **Git & GitHub 101 Workshop** — SLIIT, Feb 2026
